Welcome New Member!!

The Ellsworth Rod & Gun Club was organized in 1933. The grounds and buildings are maintained and available to the public for use. The club especially caters to non-profit organizations and their related activities. The club has held chicken feeds at the clubhouse for over 40 years. Along with the chicken feeds, we sell calendars to raise funds supporting the grounds and activities. Other activities the club is involved in include hunter safety programs, trout stream improvement projects, wildlife habitat improvement projects and public conservation education programs. Since 1939, the club has been engaged in a pheasant release program in cooperation with the Wisconsin Department of Natural Resources. The club has raised and released approximately 3000-4000 pheasants in the Pierce County area annually. In the past several years the club has run an additional fund raising activity in the form of a banquet held in the Fall of the year with all funds generated from the banquet being channeled into renovation and improvement of the pheasant breeding facility maintained by the club. More recently, through grants and hard work, trap relocation was done along with an additional trap house. There are additional plans for an archery range and riverfront pavilion.

Mission Statement: To foster, protect and conserve wildlife and our natural resources. To improve hunting and fishing opportunities and provide outdoor recreation for youth and the community

Expectations of Members:

Attend the annual meeting. All members are welcome to attend board meetings.

Attend chicken feeds and invite friends and family to as well.

Promote your club by selling our calendars. Each member should sell at least ten.

Work at least one chicken feed during the season. If you cannot work when you are scheduled, you will need to find a replacement and contact your Chairperson.

Work at the spring and fall clean up.

Get involved! Donate time for club events and projects. We are looking for new Hunter Safety instructors and the open trap shooting twice a month is growing quickly. Help is needed.

Download the Team Snap App and add the Rod and Gun to receive Minutes, event information and alerts.
